

## Children Cry for Fletcher's

# CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, imitations and "just-as-good" are but experiments, and endanger the health of children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It contains neither Opium, Morphine nor other Narcotic substance. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

## WOLCOTT'S BIG FAMILY

Descendants Now Numbering 5,000 in U. S. Hold Annual Reunion.

Chicago, Aug. 8.—Wolcotts from nearly every state in the union met in Chicago today to attend the twelfth annual reunion of the Society of Descendants of Henry Wolcott who came to Plymouth in 1630 and to whom more than 5,000 persons trace their ancestry through ten generations.

The affair had the aspect more of a national convention than of a family reunion. The program extends through Thursday.

Mayor William Hale Thompson, of Chicago, is to make the address of welcome at tomorrow's session of the reunion and Eben H. Wolcott, of Indianapolis, Ind., president of the society, is to respond. Tomorrow afternoon the Wolcott family in several score automobiles will tour the city and at night will attend a banquet at the Sherman House where the reunion is being held. It is expected nearly 1,000 members of the family will be present.

The American family of Wolcotts trace their name back to Sir John Wolcott, an Englishman who died in 1325, and their descent through a Welsh line from the tenth century. The ancestral home still stands and is original coat of arms still being used by members of the family.

## IRONS \$3.75

Westinghouse nickel-plated 6-lb. domestic irons and General Electric nickel or gunmetal finish ironing surfaced.

Your Choice  
Now \$3.75

Buy your fans from the Electric Light office and save money. No need to suffer from the intense heat when standard fans for the home and office can be had at low prices.

Wire Your House  
This Month

Then you will have the best and most cheerful illumination to make the long winter evenings enjoyable.

## USE CARE IN FEEDING

Some Kansas Rural Schools Serve Lunch for the Students.

Manhattan, Kan., Aug. 8.—"What growing children require is plenty of simple, wholesome, easily digested food, carefully prepared and regularly served," is the opinion of Miss Francis L. Brown, director of home economics, division of extension, Kansas State Agricultural college.

"Instinct is no guide in feeding children," says Miss Brown. "They should not be allowed to eat all they can hold of those things of which they are particularly fond. Farmers feed their cattle and hogs well-balanced rations, but mothers as a rule are not as keenly alive to the necessity of proper rations for their children."

"Lack of wholesome food, or improper feeding, contributes as largely to the backwardness of pupils as does some mentality. To prevent the evil effect of bad nutrition, many cities furnish either a breakfast or a warm meal at noon or in the middle of the afternoon."

"Several rural schools serve a hot dish for lunch. Yet this question in the rural schools is not so much for the balancing of rations as to add palatability and good cheer to the monotony of the every day cold and often unattractive lunch and to create a spirit of true sociability among the school children during lunch time. It is also an aid, in an indirect way, in teaching good table manners."

"The hot dish for lunch may be prepared by the teacher herself, or by a pupil or a group of pupils, but as far as possible the preparation should be outside of regular school hours. No pupil should be permitted to do this work unless all lessons are prepared, and the preparation should be given this work for one week, and later others are chosen."

## INDIAN FIGHTER GOES HOME

Patrick Benden, Age 96, Leaves Soldiers Home at Leavenworth.

Leavenworth, Kan., Aug. 8.—Patrick Benden, 96 years old, who fought Apache and Navajo Indians in the years directly following the Mexican war, and who was working at the Fort when this city was founded, has been taken from the soldiers' home to the family farm at Seneca, Kan., by his two sons, William and Pomp.

He has been staying at the soldiers' home for the past three years, but the heat of this summer has weakened his health and made his children insist on his coming to live with them on the farm.

Benden has been an army man all his life, although wounds received in the Indian wars made it impossible for him to fight through the civil war. He worked as a civilian in the Post after leaving the regular service, and knew nearly all the famous army men who were stationed at Fort Leavenworth in the early days.

## CORNING PLANS BIG PICNIC

Several Prominent Kansans on Three-Day Program This Week.

Corning, Kan., Aug. 8.—Corning will have a big three-day picnic, August 9, 10 and 11. In addition to free acts and carnival features there will be some of the best speakers each day.

August 9 Ed H. H. Atchison will deliver his lecture, "The People in the Audience," on the 10th, W. E. Landford of Seneca, Democratic nominee for governor, will speak. On the closing day Rev. C. A. Richard, pastor of the Seneca Community church, will make addresses on the closing night, "Have a good time, but be decent."

## DYNAMITE WRECKS MACHINE

Three Thrasher Separators Destroyed in Ten Days—Cases in Doubt.

St. John, Kan., Aug. 8.—Three thrashing machine separators were blown up in this section within the past ten days—two near Macksville and one near Wellburg in Edwards county. One machine near Macksville was blown into hundreds of pieces, it is said. Whether the trouble was caused from dust combustion or dynamite, it is not known, but in one or two instances dynamite is believed to have been the cause.

## BROKE ARM IN BAIL GAME

Pawnee Rock Pitcher Suffered Injury in Throwing Last Ball.

Pawnee Rock, Kan., Aug. 8.—Earl Butts broke his arm while playing ball in a game with the Pawnee Rock team. Butts was pitching for Pawnee Rock in the game when in the ninth inning with two men out and two strikes on the batter, he threw a ball intended to be the last ball of the game. The ball went off to one side and Butts dropped to the ground writhing in pain.

## ICE FAMINE AT WICHITA

Two Plants Shut Down—Others Can Hardly Supply Demand.

Wichita, Kan., Aug. 8.—An ice famine is on. For the last two days the Wichita ice plants have closed down and the burden of supplying the demand has fallen on the other companies. Boulder, Boulder and Midland ice plants compelled the managements to shut down for repairs. The other companies have been working overtime in an attempt to cope with the emergency and supply the demand. If the hot weather continues the shortage of ice will be more acute and it may be necessary to ration ice out to each customer.

## PICNIC FOR PRATT PEOPLE

Commercial Club Entertains Citizens at State Fish Hatchery.

Pratt, Kan., Aug. 8.—The Pratt Commercial club gave a community picnic to the citizens at Pratt county. The entertainment was held at the state fish hatchery grounds and several hundred from Pratt and surrounding counties participated. The Pratt Municipal band gave two concerts. Hundreds of autos were parked around the hatchery grounds and one feature was that there were but few yellow tags among the hundreds of cars, and in those cases the new tags had been applied for.

## JOHNSTON COUNTY WOMAN WILL CELEBRATE 100TH BIRTHDAY ANNIVERSARY

Olathe, Kan., Aug. 8.—For the first time in Johnstons county history one of the pioneers, residing here, Mrs. Corliss will celebrate her one hundredth birthday anniversary next Saturday, August 12, at the home of her grandson, Harry Corliss, nine miles east of Olathe.

## LUPETA PEREA HERE WITH CIRCUS

Among the performers whose exploits will thrill and dumfound spectators at the Barnum & Bailey circus which exhibits here tomorrow, is Lupeta Perea, a newcomer to the world of American "white tops" from Mexico, fleeing gladly from the revolution and its political unrest. Her mother accompanies her with the remnants of a fortune accumulated in cattle-raising near Monterey and which became the prey of insurrection.

The girl's wonderful agility asserted itself in early life. She was the marvel of her school-girl friends in hazardous feats in mid-air and amazed older beholders who witnessed her exploits. Then one day there came, during the festa days of December, a grand display in El Toreo, Mexico City's famous bull-ring before President Madero and his dignitaries. Senorita Perea's apparatus was stretched from barrier to barrier, and she, with her acrobatic skill, performed an exhibition still remembered in the capital.

Her entrance into professional dates from her triumph upon that occasion. It was not long before her fame had spread all through the republic of Mexico. Her talents are devoted solely in her lithe and nimble body. When she isn't amazing onlookers by her feats aloft in the "big top," she may be generally found ensconced in a corner of the circus "green room" with a pad and pencil, perpetuating the forms and faces of her associate performers. Clowns, equestrians, aerialists, acrobats, chariot drivers and all the other multifarious figures and features of the big show are being put in black and white. The little beauty of the circus, for she is a beautiful girl, has twelve different costumes which she carries with her despite the protests of the circus property men. Then, too, she has a stunning street attire, and Senorita Perea has, "off on don," the reputation of being the best dressed girl of the circus.

"Not always will I be a public circus performer," she declared in a recent interview. "My real love is for the pencil and paper and maybe my products will yet attract praise worth while. When this big circus folds it self away for the winter, I'm going back to New York and study art in earnest."

## AN ACTIVE CAREER

Charles Allen Mills Saved Millions to Government.

Charles Allen Mills, who was buried today at Mt. Hope cemetery, enjoyed a unique experience in postal affairs. Born in Bloomington, Delaware, a graduate of Georgetown university in the regular and legal courses, he was diverted from the law, which he had intended to follow, by joining the Clara Barton Red Cross expedition to Cuba in 1898, during our war with Spain.

President McKinley, attracted by Mr. Mills' ability and personality, appointed him to take charge of the money order department in the Santiago, Cuba, postoffice. While there, Mr. Mills discovered that enormous peculations were going on in connection with the money order office. He made a careful investigation, reported the situation, and the result was a saving to the government of over a million dollars.

President McKinley and his postmaster general, Charles Emory Smith, in recognition of the valuable services of Mr. Mills, appointed him to an important position in the newly planned rural routes. Mr. Mills probably laid out more rural routes in Kansas than any other man after these routes were established, he was made a postoffice inspector in which position he served with exceptional ability, commensurate with his fine character, by both the department and those in direct charge of the postal service.

Mr. Mills was a warm personal friend of Vice President James S. Sherman, who was anxious for him to come to his home city, Utica, New York, and reside, but Mr. Mills declined to remain in Kansas. He was a kindly neighbor, a good husband and father. He was married fifteen years ago to Clemmie Linn, the only daughter of Dr. H. C. Linn, who survived him with three sons, Linn, Charles and Morris.

## NOTIFY HANLY

Prohibitionists Stage Big Celebration at Indianapolis.

Indianapolis, Aug. 8.—Representative prohibition leaders from all over the United States assembled in Indianapolis today for the double notification meeting at which J. Frank Hanly was formally notified of his nomination for president on the prohibition ticket, and Dr. Ira Landtrith of Boston received a similar formal notification of his nomination for the vice presidency.

## SHIPMENTS FALL OFF

Kaw Valley Has Sent Out 1,139 Carloads of Potatoes.

Potato shipments from the Kaw valley Saturday totaled only thirty cars. Nine cars were shipped from the Orick district Saturday and Sunday. Approximately 2,100 bushels of home-grown were hauled into Kansas City in wagon loads.

Saturday's shipments bring the total carlot shipments from Kansas this summer up to 1,025 cars besides the 114 cars into Kansas City by wagon. The Kansas City market was about the same as the day before. Onions and cabbages in bulk sold for 70 and 85 cents a bushel, sacked 95 cents a bushel.

## SUMMER-SPOILED SKIN

Removed by Absorption

As undue summer exposure usually leaves an undesired surface of tan, redness or roughness, often freckles, too, the sensible thing to do is to remove such surface blemishes by the use of a special cosmetic. This is the only way to get a clear, healthy skin.

The skin of the face is the most sensitive part of the body. It is the only part of the body which is exposed to the sun's rays. It is the only part of the body which is exposed to the wind. It is the only part of the body which is exposed to the dust of the air. It is the only part of the body which is exposed to the heat of the sun. It is the only part of the body which is exposed to the cold of the winter. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring. It is the only part of the body which is exposed to the sleet of the winter. It is the only part of the body which is exposed to the wind of the spring. It is the only part of the body which is exposed to the rain of the spring. It is the only part of the body which is exposed to the snow of the winter. It is the only part of the body which is exposed to the ice of the winter. It is the only part of the body which is exposed to the frost of the winter. It is the only part of the body which is exposed to the hail of the spring.
